

Tristan Lawson recently became an Offensive Security Certified Professional. This achievement gives Tristan a total of 14 certifications. The OSCP is a complete, hands-on information security certification and tests the candidate's ability and knowledge in the discipline of penetration testing. Tristan's proven talent enables Infogressive in performing security testing and auditing for a variety of businesses and organizations across the U.S.

Todd Bohling recently became a Certified Information Systems Security Professional. He joins a select group of 40,000 CISSPs in the U.S. As the Director of Sales, Todd focuses on helping organizations across the U.S. understand risk and how to minimize their exposure to hackers.

Justin Kallhoff recently passed the GIAC Certified Intrusion Analyst exam. GCIAs have the knowledge, skills, and abilities to configure and monitor intrusion detection systems, and to read, interpret, and analyze network traffic. Justin now has 10 information security certifications.
